

Date/Time	Attendees	Team Progress	Individual Progress	Task allocation
28/01/2025 14:30 – 15:00		Group and choosing a project to work on	N/A	N/A
04/02/2025 10 AM	Emile, Farhaan N, Farhaan M, Milagros, Josefina, Sawaira	Discussed the questions to ask the client, the people asking the questions and the people writing notes.	N/A	
04/02/2025 14:20-14:40	Emile, Farhaan N, Farhaan M, Milagros, Josefina, Sawaira, Ade	Spoke with the client about the project, requirements, and ways to stay in contact	N/A	Josefina, Milagros, and Farhaan N asked questions to the client, Emile. Farhaan M, Ade, and Sawira took notes.
04/02/2025 14:40-16:20	Emile, Farhaan N, Farhaan M, Milagros, Josefina, Sawaira, Ade	N/A	SRS Document: Josefina: Allocated tasks, wrote introduction and created interface. Emile: Wrote the LSEPI. Farhaan M: Created the risk assessment. Ade: Created functional requirements Milagros: Created the Gantt chart	N/A

			and non-functional requirements. Farhaan N: Did the data description and part of the functional requirements. Sawaira: Did the introduction (team expertise and rationale of topic choice).	
14/02/2025 10AM – 10:40AM	Milagros, Josefina, Farhaan N, Emile, Sawaira, Ade MISSING: Farhaan M.	Group progress is good. The requirements document is almost complete; only a few diagrams are missing. The project has undergone several developments, including the database creation, lockdown browser coding, and the establishment of the base structure.	Farhaan N created the database but has problems linking the data from table to table. Milagros and Emile didn't progress on the coding, but that's due on Monday. Ade started working on the Login page. Farhaan M had good progress with the lockdown browser.	Farhaan N has been tasked with the Core Data Diagram, and Sawaira needs to do the Justification for the Use Diagram. Milagros and Emile need to do the skeleton. Josefina needs to finish the interface rationale.
18/02/2025 10AM – 11:50AM	Milagros, Josefina, Farhaan N, Emile, Sawaira, Ade ONLINE: Farhaan M	The group is working well. I have made progress on both the front end and the back end. HTML, CSS, PHP, and database have been used.	Milagros and Emile created the website skeleton. Ade has done PHP to link the website and database; this will be connected later. Farhaan N has done the database. Sawaira has done	Farhaan N is to create a core data diagram and assemble the skeleton and database.

			the use case diagram. Farhaan M has made progress with the lockdown browser, and Josefina presented the user interface, discussed testing, and spoke with the client about their preferred meeting time.	
18/02/2025 14:00-16:00	Milagros, Josefina, Farhaan N, Emile, Sawaira, Ade, Farhaan M	Everyone is working on their respective tasks. We changed the programming language from PHP to Java.	N/A	N/A
25/02/2025 10:00 – 12:00	Josefina, Sawaira, Milagros, Emile, Farhaan N	A little behind on the programming tasks.	Farhaan M – Has created the files needed for lockdown control.	Milagros has to create a method for logging in and logging out. Ade is developing a method for import and export. Emile is creating a method for the search functionality and editing. Josefina will create a method that shuts down the app after the password has been entered

				incorrectly three times.
25/02/2025	Josefina, Sawaira, Milagros, Emile, Farhaan N, Farhaan M	A little behind. Need to do the programming tasks.	N/A	N/A
28/02/2025	Josefina, Emile, Farhaan N	Came together to see how everyone has done with their respective tasks	Emile created the search function.	
04/03/2025 10:00 – 12:00	Farhaan N, Sawaira, Josefina, Milagros, Emile	This meeting was largely a gathering of everyone to complete code tasks.	Josefina worked on the edit code, Sawaira wrote code to view documents, Farhaan N tested the available classes, and Ade wrote the import/export function.	
04/03/2025 14:00-16:00	Farhaan N, Sawaira, Josefina, Milagros, Emile, Farhaan M, Ade	Everyone got on with their tasks.	Emile worked on the HTML and CSS. Farhaan M worked on the delete function. Milagros is doing the Gantt chart. Sawaira is coding for the document. Ade is testing the import/export function. Farhaan M created the function to connect the database and	Farhaan M will delete and add the function. Ade is trying to integrate parts of the system. Milagros will continue with login and logout functions. Sawaira is creating a function to open and view the document. Emile will work on the HTML and CSS.

			front end and sorted the SQL. Josefina finished the edit function and checked the SRS document.	Farhaan N will make the search function and add sample data. Josefina will test the edit and create the password shutdown.
07/03/2025 10:00 – 12:00	Ade, Emile, Josefina, Milagros, Sawaira	Our group came together to review the progress and continue our tasks.	Josefina made the requirements document ready for submission. Sawaira did the open word document code. Milagros completed the Gantt chart. Farhaan N attempted to import the data into the database. Ade tried to combine the import/export function and search function. Emile has made the front end more presentable by doing the HTML and CSS.	Farhaan M will do the search function. Milagros will continue with the login and logout functions. Josefina will test the edit function. Sawaira will continue with the open document function. Ade will organise the files in Basecamp. Emile will continue with the front end.

11/03/2025 10:15	Milagros, Emile, Josefina	Everyone prepares their code for the demonstration, making it more presentable for the client.		
18/03/2025	Josefina, Milagros, Sawaira, Farhaan N and Farhaan M.		N/A	Continued coding.
25/03/2025	Josefina, Milagros, Sawaira, Farhaan N, Emile	Discussed testing and backend coding	N/A	Milagros will supervise unit testing. Josefina will finish the acceptance testing of the database-website connection. Sawaira is working on the user manual. Farhaan N will work on the CRUD elements Emile will work on the movement between HTML pages.

28/03/2025 10 AM	Sawaira, Josefina, Emile	Discussed improving the functionalities of the website.	N/A	
01/03/2025 10 AM	Farhaan N, Farhaan M, Milagros and Josefina	The group has progressed towards the project and has a working link to the website and database.	Josefina is testing the addrecord pages. Farhaan N is working on those. Milagros is working on the log-in. Farhaan M has finished lockdown. Emile is working on the website's functionalities.	Josefina will do acceptance testing. Milagros will handle the login and retrieve the passwords from the database. Farhaan will link the lockdown to the log-out button.
04/03/2025	Josefina, Emile, Farhaan N, Farhaan M, Milagros and Ade	Our group held a meeting to discuss the progress made and outline future updates that need to be implemented.		Emile will do the code inspection, Farhaan N will add to the databases, Milagros will fix the login errors, and Josefina will add the edits and begin acceptance testing.
08/04/2025	Josefina, Sawaira, Farhaan M, Farhaan N, Emile, Milagros	We met in the library to do the code and find what was missing and what needed to be added.	Emile did the code inspection, Farhaan M did the delete functionalities and tested the add functionalities, Farhaan N made the add function	Everyone will get on with the testing of the different functions.

			and helped test them
